

Test Professionals **“Improve your Critical Thinking Skills”**

Business Challenge

Do you find as many bugs as you should?

Are requirements incomplete, inadequate, defect-prone but you can't get them fixed?

Do you find it difficult to argue your case?

Are you as effective as you should be?

Action

Consider how more effective you could be with this new skill.

Identify who else in your organisation would benefit

Our Solution

Some questions for you:

- Do you find it hard to critique the thinking or work of other people?
- Can you tell the difference between reason and rhetoric?
- Can you reason with others to make your point?

We will improve your critical thinking skill levels by challenging you, getting you to think for yourself and reason with others.

Critical thinking is a life-skill that makes you more insightful, assertive and better able to 'make your case' effectively.

If you have one free day, take our tutorial.
